**Mobile no: 8500791175**

**Date: 13<sup>th</sup> March 2023**

Insurance is a contract, a legal agreement between two parties, i.e., the individual named insured and the insurance company called insurer. In this agreement, the insurer promises to help with the losses of the insured on the happening contingency. The insured, on the other hand, pays a premium in return for the promise made by the insurer.

### **Principles of Insurance**

The concept of insurance is risk distribution among a group of people. Hence, cooperation becomes the basic principle of insurance.

To ensure the proper functioning of an insurance contract, the insurer and the insured have to uphold the 7 principles of Insurances mentioned below:

- 1. Utmost Good Faith**
- 2. Proximate Cause**
- 3. Insurable Interest**
- 4. Indemnity**
- 5. Subrogation**
- 6. Contribution**
- 7. Loss Minimization**

- Principle of Utmost Good Faith**

The fundamental principle is that both the parties in an insurance contract should act in good faith towards each other, i.e., they must provide clear and concise information related to the terms and conditions of the contract.

**Example** – Jacob took a health insurance policy. At the time of taking insurance, he was a smoker and failed to disclose this fact. Later, he got cancer. In such a situation, the Insurance company will not be liable to bear the financial burden as Jacob concealed important facts.

- **Principle of Proximate Cause:**

This is also called the principle of ‘Causa Proxima’ or the nearest cause. This principle applies when the loss is the result of two or more causes. The insurance company will find the nearest cause of loss to the property. If the proximate cause is the one in which the property is insured, then the company must pay compensation. If it is not a cause the property is insured against, then no payment will be made by the insured.

**Example** –

Due to fire, a wall of a building was damaged, and the municipal authority ordered it to be demolished. While demolition the adjoining building was damaged. The owner of the adjoining building claimed the loss under the fire policy. The court held that fire is the nearest cause of loss to the adjoining building, and the claim is payable as the falling of the wall is an inevitable result of the fire.

- **Principle of Insurable interest**

This principle says that the individual (insured) must have an insurable interest in the subject matter. Insurable interest means that the subject matter for which the individual enters the insurance contract must provide some financial gain to the insured and also lead to a financial loss if there is any damage, destruction or loss.

**Example** – the owner of a vegetable cart has an insurable interest in the cart because he is earning money from it. However, if he sells the cart, he will no longer have an insurable interest in it.

To claim the amount of insurance, the insured must be the owner of the subject matter both at the time of entering the contract and at the time of the accident.

- **Principle of Indemnity:**

This principle says that insurance is done only for the coverage of the loss; hence insured should not make any profit from the insurance contract. In other words, the insured should be compensated the amount equal to the actual loss and not the amount exceeding the loss. The purpose of the indemnity principle

is to set back the insured at the same financial position as he was before the loss occurred. Principle of indemnity is observed strictly for property insurance and not applicable for the life insurance contract.

**Example** – The owner of a commercial building enters an insurance contract to recover the costs for any loss or damage in future. If the building sustains structural damages from fire, then the insurer will indemnify the owner for the costs to repair the building by way of reimbursing the owner for the exact amount spent on repair or by reconstructing the damaged areas using its own authorized contractors.

- **Principle of subrogation:**

Subrogation means one party stands in for another. As per this principle, after the insured, i.e. the individual has been compensated for the incurred loss to him on the subject matter that was insured, the rights of the ownership of that property goes to the insurer, i.e. the company.

Subrogation gives the right to the insurance company to claim the amount of loss from the third-party responsible for the same.

**Example** – If Mr A gets injured in a road accident, due to reckless driving of a third party, the company with which Mr A took the accidental insurance will compensate the loss occurred to Mr A and will also sue the third party to recover the money paid as claim.

- **Principle of Contribution**

Contribution principle applies when the insured takes more than one insurance policy for the same subject matter. It states the same thing as in the principle of indemnity, i.e. the insured cannot make a profit by claiming the loss of one subject matter from different policies or companies.

**Example** – A property worth Rs. 5 Lakhs is insured with Company A for Rs. 3 lakhs and with company B for Rs.1 lakhs. The owner in case of damage to the property for 3 lakhs can claim the full amount from Company A but then he cannot claim any amount from Company B. Now, Company A can claim the proportional amount reimbursed value from Company B.

- **Principle of Loss Minimisation**

This principle says that as an owner, it is obligatory on the part of the insurer to take necessary steps to minimise the loss to the insured property. The principle does not allow the owner to be irresponsible or negligent just because the subject matter is insured.

**Example** – If a fire breaks out in your factory, you should take reasonable steps to put out the fire. You cannot just stand back and allow the fire to burn down the factory because you know that the insurance company will compensate for it.

**Insurance is a contract, a legal agreement between two parties, i.e., the individual named insured and the insurance company called insurer. In this agreement, the insurer promises to help with the losses of the insured on the happening contingency. The insured, on the other hand, pays a premium in return for the promise made by the insurer.**

## **Principles of Insurance**

- 1. Utmost Good Faith**
  - 2. Proximate Cause**
  - 3. Insurable Interest**
  - 4. Indemnity**
  - 5. Subrogation**
  - 6. Contribution**
- Loss Minimization**

- **Principle of Utmost Good Faith**

The fundamental principle is that both the parties in an insurance contract should act in good faith towards each other, i.e., they must provide clear and concise information related to the terms and conditions of the contract.

- **Principle of Proximate Cause:**

This is also called the principle of 'Causa Proxima' or the nearest cause. This principle applies when the loss is the result of two or more causes. The insurance company will find the nearest cause of loss to the property. If the proximate cause is the one in which the property is insured, then the company must pay compensation. If it is not a cause the property is insured against, then no payment will be made by the insured.

- **Principle of Insurable interest**

This principle says that the individual (insured) must have an insurable interest in the subject matter. Insurable interest means that the subject matter for which the individual enters the insurance contract must provide some financial gain to the insured and also lead to a financial loss if there is any damage, destruction or loss.

- **Principle of Indemnity:**

This principle says that insurance is done only for the coverage of the loss; hence insured should not make any profit from the insurance contract. In other words, the insured should be compensated the amount equal to the actual loss and not the amount exceeding the loss. The purpose of the indemnity principle is to set back the insured at the same financial position as he was before the loss occurred. Principle of indemnity is observed strictly for property insurance and not applicable for the life insurance contract.

- **Principle of subrogation:**

Subrogation means one party stands in for another. As per this principle, after the insured, i.e. the individual has been compensated for the incurred loss to him on the subject matter that was insured, the rights of the ownership of that property goes to the insurer, i.e. the company.

Subrogation gives the right to the insurance company to claim the amount of loss from the third-party responsible for the same.

- **Principle of Contribution**

Contribution principle applies when the insured takes more than one insurance policy for the same subject matter. It states the same thing as in the principle of indemnity, i.e. the insured cannot make a profit by claiming the loss of one subject matter from different policies or companies.

- **Principle of Loss Minimisation**

This principle says that as an owner, it is obligatory on the part of the insurer to take necessary steps to minimise the loss to the insured property. The principle does not allow the owner to be irresponsible or negligent just because the subject matter is insured.

## **BENEFITS OF LIFE INSURANCE**

- SUPERIOR SAVINGS PLAN
- ENCOURAGE SAVING HABITS
- SUITABLE FOR RAISING LOANS
- EASY SETTLEMENT PROTECTION AGAINST CREDITORS
- TAX RELIEF
- ESTATE DUTY
- ECONOMIC PROTECTION
- INVESTMENT ELEMENT

Adikavi Nannaya University,  
Rajamahendravaram

Sir,

Sub :- SKR Government Degree College (Women), Rajamahendravaram –  
Submission of Feedback Report 2022-23 Reg.

This is to submit that, as an institutional practice, SKR Government Degree College (Women), Rajamahendravaram which is under the jurisdiction of Adikavi Nannaya University, Rajamahendravaram collects feedback on college / curriculum from time to time from its stakeholders.

During the academic year 2022-2023, feedback was collected from students, teachers, parents and alumni. A copy of the feedback report is submitted to your office for your information.

Thanking you, Sir.

**Feedback Report 2022-2023**

For the academic year 2022-2023, feedback on the college functioning including teaching learning process was collected from the students, teachers, parents and alumni in online mode. For the students, a feedback form was designed with 20 questions on 20 parameters with 5 options namely - Strongly Agree, Agree, Neutral, Strongly disagree and Disagree.

179 responses collected from the students. Before collection, the purpose of feedback was explained to the students. If the students could not understand any parameter, the mentors explained the parameter and its importance. With the help of the faculty, the IQAC arranged for the analysis of the collected data; the analysis was tabulated and also presented in a graphical format. For the teachers, alumni and parents, a feedback form was customized with 10 questions covering different areas of the college functioning. The analysis report reveals that:

- Stakeholders expressed their opinion that supports the students to prepare for competitive exams.
- More Cultural activities are to be organized in the college

### **Action Taken Report on Feedback -2022-2023**

The feedback report for the academic year 2022-2023 was placed before the staff council meeting chaired by the principal of the college. The council discussed the report in detail. For all the positive feedback about the teaching learning process, the efforts of the teachers were appreciated. The meeting resolved to take the following measures to improve the overall functioning of the college.

Student Centered Learning (SCL) practices in curriculum delivery and transaction were given much emphasis.

Based on the parents & alumnae feedback, PG coaching is continued in a more structured manner and offered support to the students seeking higher education.

The mentors were specifically directed to provide emotional support to students and be accessible to them even out of the classroom, following the spirit of the Mentor Mentee System (MMS) in place.

## DEPARTMENT OF ECONOMICS

### BRIDGE COURSE 2022-23

#### **“THE ESSENCE OF EDUCATION LIES IN DRAWING OUT THE VERY BEST THAT IS IN YOU”**

A bridge course is a class or series of classes that help the students transition from +2 to college by providing them with the necessary skills and knowledge about the topics that will be covered in their new courses.

#### **OBJECTIVES:**

- The main objective of the course is to bridge the gap between subjects studied at pre level and the subjects they would be studying in graduation.
- To enrich the students to learn basic concepts in the subjects of BA course.
- To give students confidence and skills to successfully transform to college and new curriculum.
- Interactive and Active Learning by doing have been weaved into the Bridge Course.
- Active Learning with the help of other/peer students.
- To achieve the concept of Assisted Learning.

#### **Standard Operating Procedure**

- A Bridge course for newly admitted BA students is conducted every year before commencement of First Semester classes. The syllabus for the BA courses designed in such a way that, equal importance is given to both Economics discipline subjects and personality development.
- Bridge Course helps the students to open up, think creatively and become responsible and independent students. It also helps smooth transition arts course. The sound grasp of the fundamentals of ECONOMICS subject by the students lays the strong foundation for the entire Three/Four Years Programme.

#### **Highlights of the Bridge Course:**

#### **MICRO ECONOMIC ANALYSIS:**

Smt. CV Ramalakshmi, Faculty, Department of economics explained in detail about the basic economic concepts. She elaborated the concepts with real world examples. She also explained the role of a person as consumer in achieving the economic goals of the life with help of the basic knowledge of economics.

She narrated the live incidents of economic problems of a nation and economy and the role of the governments in providing the economic welfare of the people in a nation.

## One Day International Webinar

On

### EMPOWERING THE WOMEN ENTREPRENEURSHIP IN INDIA

Organized by

**DEPARTMENT OF ECONOMICS**

**28<sup>th</sup> March, 2023 from 10:00 am to 12:30 pm**

#### About the Webinar

Women entrepreneurs and their increasing presence in India have significantly influenced the social and economic demographics of the country. The participation of women in the labour force has helped millions of families to pull out of poverty and has led to job creation. Women are well known for their leadership skills and hence dominate in new-age industries such as electronic manufacturing, where more than 50% of the employees are women because of their high-precision work and better productivity levels. This attitude towards work and commendable business skills have also emphasised the importance of women in the modern workforce. In this scenario, this webinar focusses on the key role of financial and business development service providers unlocking women entrepreneurs' potential and the role of the government in gender inclusiveness

#### About the Department

The Department of Economics came into existence with the inception of the college in the Year 1968. B.A. Course was started with the combination of group subjects i.e History, Economics, politics, English etc. The department of economics has started its academic journey with the efficient teaching staff and involved actively in the various national level associations right from the beginning. With the inspiration from the superannuated staff the department members actively organising webinars, guest lectures, promoting student projects and surveys to have a practical knowledge of economic science.
