

S.K.R. COLLEGE FOR WOMEN, RAJAHMUNDRY
Reaccredited with NAAC B+ Grade

ENERGY POLICY FOR THE ACADEMIC YEAR 2021-2022

Energy Audit is the first step which can be conducted within an Organization for the development of electrical energy efficient measures. The ultimate goal of the energy audit is to emphasize the concept of energy conservation in the campus of Educational Institute.

University Grants Commission (UGC) has made the mission “Green Campus”, Clean Campus” mandatory for all higher educational Institutes. Realizing the need of being responsible towards the environment, NAAC (National Assessment and Accreditation Council) , an autonomous body under UGC has also included the oncept of Environmental Audit in accreditation methodologies of State and Central Universities as well as Colleges.

As a part of this, S.K.R. College for Women, has laid down some policies regarding energy savings which include:

- Minimise Energy Consumption by the use of energy efficient equipments.
- Maximum usage of Day Light.
- Usage of Natural Ventilation.
- Create awareness among students and staff about energy conservation.

To achieve these, the following methodologies were being followed / to be followed by the college.

- Training faculty, students to make the Institute as an efficient in energy conservation.
- Carry out regular internal energy audit .
- Inviting experts in the respective fields.
- Replace old electrical appliances with star rated equipment.
- LED Lights.
- Proper maintenance of equipment.
- Enrich the experience of Energy Conservation by exchanging of ideas with other Organizations.
- Roof Top Solar Panels.
